

Mississippi Boat

As the last remnant of America's rivers' glories existing during the last century, the Mississippi boat was named with public whimsy. Its hull nearly did not emerge but would show a superstructure of three to four floors. It was easily recognized with its two pairs of high chimneys. The boat was designed to give travelers the comfort of the greatest hotels.

Le bateau du Mississippi

Dernier témoin de la glorieuse traversée des fleuves américains au siècle dernier, le bateau du Mississippi était né par des ruses à modes. Sa coque émergeait à peine et laissait voir une superstructure de trois à quatre étages; on la reconnaissait facilement à sa paire de hautes cheminées. Le bateau était envisagé avec le confort des plus grands hôtels.

El barco del Mississippi

Último testigo de la gloriosa época de la navegación sobre los ríos americanos, se le dijo pateteo, el barco del Mississippi era propulsado por ruedas de paletas. Su casco surge apenas del agua y soportaba una superestructura de tres a cuatro pisos. Se reconocía fácilmente por sus dos altas chimeneas. El barco estaba concebido con todas las comodidades de los hoteles más lujosos.

La nave del Mississippi

Ultima testimonianza della gloriosa traversata dei fiumi americani nel secolo scorso, la nave del Mississippi era mossa da un sistema di propulsione con ruote a palette. La scocca emergeva appena dall'acqua, lasciando apparire una struttura di quattro piani; era inoltre facilmente riconoscibile per i suoi due grandi camini. La nave era organizzata in modo da offrire ai viaggiatori le stesse comodità dei migliori alberghi.

Mississippiampfer

Der Mississippi-Raddampfer ist der letzte Zeuge aus der Zeit der prächtigen Flußfahrten im Amerika des vergangenen Jahrhunderts. Auf drei liegenden Bohrern sind drei bis vier Decks aufgesetzt. Die beiden hohen Bohrstänne gehen zu dem markantesten Merkmalen der Schaufelradampfer, die den gleichen Komfort wie große Hotels bieten.

Mississippi-boat

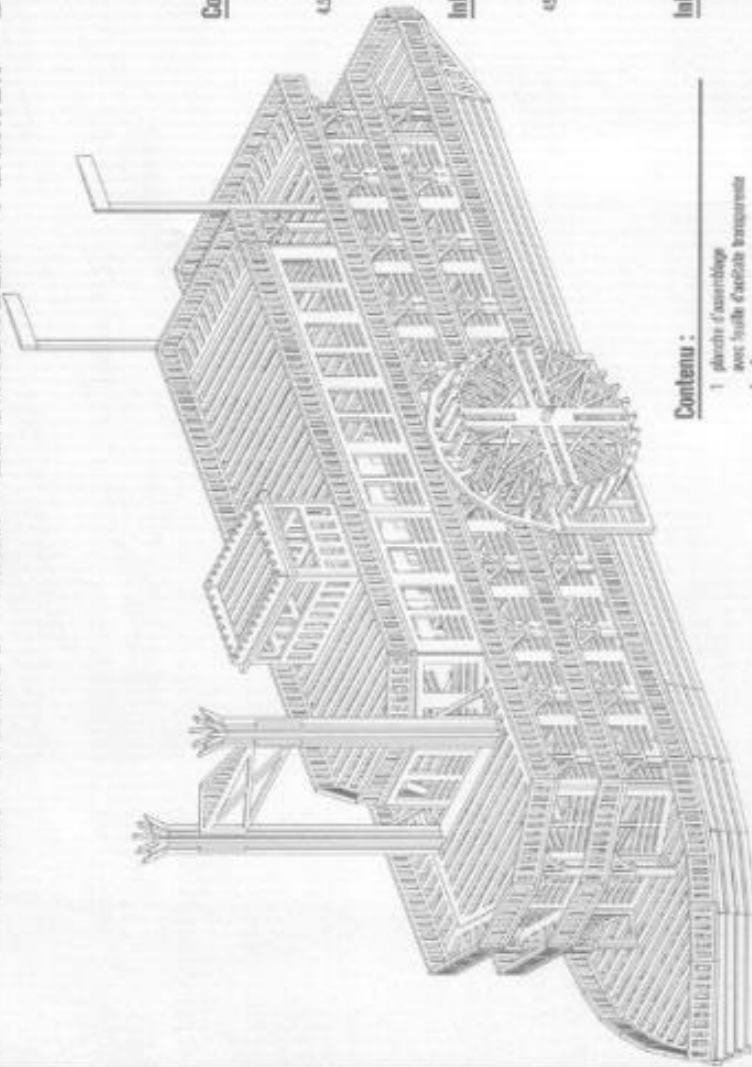

De Mississippi-raddampfer, het laatste overblijfsel van de prachtige schepen die in de negentiende eeuw op de Amerikaanse rivieren voeren, werd aangedreven door schroeven. Zijn romp stak amper uit het water, maar had een bovenbouw van drie of vier verdiepingen. Hij was ook goed herkenbaar dankzij zijn twee hoge schoorstenen. Op het uiterlijk konden reizigers dezelfde luxe vinden als in de beste hotels.

ミシシッピボート

明末のアメリカの河川に活躍した豪華な船が最後の名残りの証。船のミシシッピボートは、船体は水面上にほとんど見えず、3〜4階建ての超豪華な船体で知られています。また、2本の高い煙突が特徴です。この船は、豪華なホテルと同様の快適さを提供するために設計されました。
